# Tattoo Aftercare Tips & Advice

- Treat your new tattoo with extreme care. Only touch it with clean hands!
- Wash your tattoo with an antibacterial fragrance-free soap and pat dry.
- Keep your tattoo hydrated with fragrance-free lotion and always ask your artist which aftercare treatment they prefer.
- Let your tattoo breathe, but do not expose it to direct sunlight, sand or chlorinated water until it is fully healed.
- Don't pick, rub, scratch or peel your tattoo. If it's itchy, it's healing; apply lotion to rehydrate it. Never shave your tattoo until it is fully healed.
- If you have any questions during the healing process, don't hesitate to reach out to us and ask. We're happy to offer our advice and guidance.
